

From The Trunk — On-Page Copy for Every Page

One keyword-bearing H1, a title tag, and a unique meta description per page · July 2026

Rules: one single H1 per page (fix the homepage, which currently renders its tagline twice) · titles kept to ~60 characters · every meta description unique and ~155 characters or less. URLs follow your current nav — your developer maps them to the real routes.

F. No-index pages (no SEO copy needed)

Cart, Checkout, Account, Wishlist, Search and order-confirmation pages don’t need SEO titles/H1s — set them to “noindex, follow” (they’re already blocked in robots.txt). Each can keep a simple functional H1 (e.g. “Your Bag”, “Checkout”).
